

## JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove set out on a cross country RV trip. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

While on their trip, John spent time talking to former business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a substantial market for a product that could promptly and safely lift people in the air to accomplish maintenance and other building functions.

Following their return from holiday, John set up a business with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into existing models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into many different international marketplaces and continues to cultivate innovative equipment to ensure that customers are able to become safer and more resourceful within their workplace.
